

Santa Lucia Glass Bevel Diagram

- First, show your new table to your local glass company. It is best to do this in person.
- Explain to them that you would like a template custom cut to the shape of the top of your new table to achieve an exact fit. Show them this drawing to explain to them the way you would like your glass to be beveled. Explain that the glass is to fit flush to the edges of the table frame.
- Determine the thickness of the glass and edge finish. We prefer 3/4" thick glass with a flat polished edges. 1/2" also works but is less impactful.
- Please call us if you have any questions.

 This is the width of your bevel. We like 1" for tables up to 42" and 1.5 for tables over that size.
